

CALL FOR PAPERS

Advanced Statistical Inference Methods and Their Applications

A Special Issue of Mathematics

We invite original research and focused reviews that advance estimation, testing, uncertainty quantification, variable selection, causal inference, and statistical learning for complex data.

Topics include

High-dimensional inference
Frequentist and Bayesian methods
Nonparametric and semiparametric inference
Causal inference and robust procedures

Functional and longitudinal data
Missing, censored, and error-prone data
Resampling and simulation-based methods
Post-selection inference and statistical learning
Biostatistical applications

DEADLINE FOR MANUSCRIPT SUBMISSIONS

31 July 2027

GUEST EDITOR

Dr. Honglang Wang

Indiana University Indianapolis | hlwang@iu.edu
